

ADITYA KRISHNA.S

DEVELOPER

ABOUT

As a second-year BCA student with a strong interest in programming, I am eager to deepen my understanding of software development and data-driven decision-making. While I am still exploring the vast landscape of programming, my passion for creating user-friendly websites drives my commitment to learning and growth. I am currently developing my proficiency in Java and Python, aiming to leverage these skills to build innovative and efficient solutions. With a strong work ethic and a keen eye for problem-solving, I aspire to contribute meaningfully to business strategies through technology. I look forward to collaborating with like-minded professionals and applying my knowledge in real-world scenarios to make a positive impact in the ever-evolving tech industry.
